Welcome Letter from the Organizer

It is encouraging to see the global water industry entering a new phase of investment, innovation and collaboration. According to the latest market forecast from Global Water Intelligence (GWI), global capital expenditure on water infrastructure is expected to grow at a 3.8% CAGR through 2030. This confirms what we see across the industry: water is becoming central to economic security, climate resilience and sustainable growth.

China is also moving into a new stage of high-quality, integrated development. Guided by the Beautiful China Initiative and China's 15th Five-Year Plan (2026-2030), the country is advancing integrated water management and accelerating upgrades to wastewater collection and treatment infrastructure.

But investment and policy ambition must be matched by solutions that can be deployed at scale. This is why WATERTECH CHINA 2027 brings together technology providers, utilities, EPCs, project owners, investors and industry leaders from China and international markets.

In 2027, we will further connect water technologies with HVAC and energy efficiency, opening new opportunities across the water-energy-carbon nexus. Whether you are entering China, expanding into high-growth markets or building global partnerships, WATERTECH CHINA is where meaningful business connections begin.

We look forward to welcoming you to Shanghai.

WATERTECH — The World's Leading Water Show

WATERTECH CHINA 2026 DATA

Exhibitors' Feedback

"Our booth at WATERTech CHINA drew strong interest from numerous domestic and international buyers and engineers, clearly reflecting the surging market demand and upgrading trends for high quality water solutions in China."

"At the show, we attracted a large number of industry clients for consultations. The overall exhibiting experience and cooperation results were highly satisfactory!"

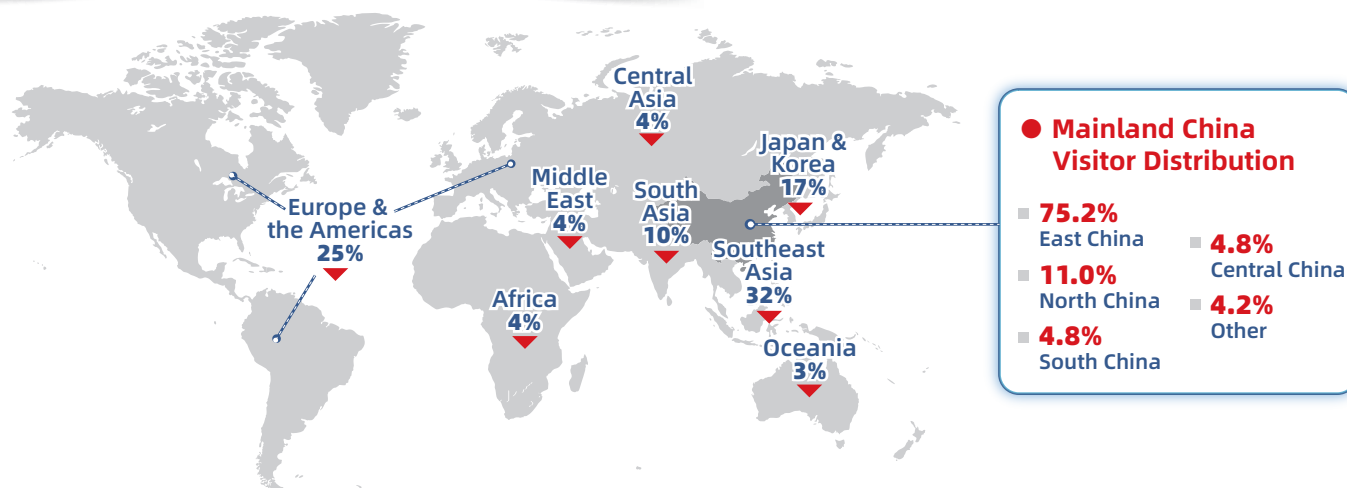

"Our long time participation in WATERTech CHINA paid off well this year - we met more professional visitors than expected, and the 100+ concurrent sessions brought quality leads that boosted our business. We look forward to joining again next year."

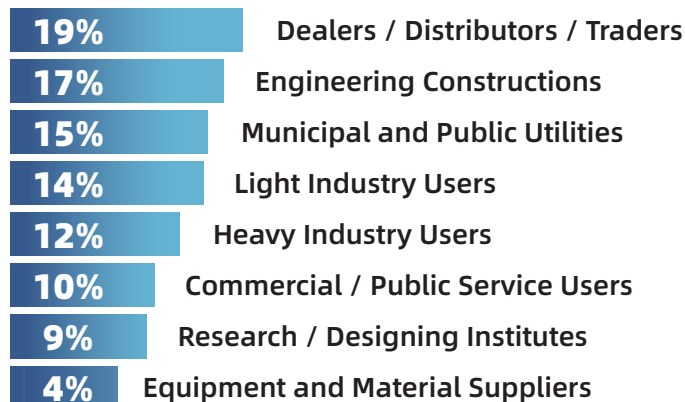

"This year's show was highly effective, with strong overseas resource implementation and high quality. Despite the venue change to SNIEC next year, we aim to secure a 300+ sqm booth. All are welcome to visit and discuss environmental solutions."
